Projects

TimeTrack

An semi infinite runner game where the protagonist has to travel through different time portal that takes her through different stages of human evolution. During this adventure, she travels through the Stone Age, the Medieval Age, the Modern Age, the Post-Modern Age and the Apocalyptic Age with an unlockable world, the Jurassic Age.

I along with my team are selected to **present this game** in **SLUSH - 2018**, one of the world's leading start up event making us the **first team from India** to go to **SLUSH** to present our game.

L'Equips Reader

This app is all about **bringing poem in visual form** . In this a visual context of the theme goes on along with the poem. This is especially helpful for students who are unable to understand the context of poems or are unable to visualize. This app helps students to visualize things in an easy way and understand them.

Virtual SpaceX

Virtual spacex is a virtual reality app that allows users to **experience space from tesla's starmen view** . Using this application people can experinece as if they are sitting in tesla roadster and looking into space.
